Premium Indoor Comfort with Amana® Brand Heat Pumps

Beat the summer heat and the winter cold with a premium Amana brand ASZ14 R-410A Heat Pump — a unit that provides you with high-efficiency, outstanding performance, and quiet operation. This heat pump’s reliable operation and outstanding features add up to premium indoor comfort. The Amana brand has a long reputation for providing quality and innovation in home appliances, and our heating and air conditioning products are made with the same level of commitment. You can expect years of dependable service from your Amana brand ASZ14 R-410A Heat Pump. Why suffer through hot, humid days or cold, frigid nights with an inefficient, lower SEER noisy heat pump when an Amana brand ASZ14 unit with chlorine-free R-410A refrigerant can consistently deliver quiet, energy-conserving comfort?

Energy-Saving Efficiency

When properly matched and installed, your Amana brand ASZ14 Heat Pump offers up to 15 SEER energy-efficiency performance. “SEER” stands for Seasonal Energy Efficiency Ratio, a measure used by the U.S. Department of Energy to rate the cooling efficiency of air conditioners and heat pumps. The higher the SEER, the greater the efficiency — and the lower the operating cost. Compared to lower SEER units found in many homes, an ASZ14 heat pump provides significant savings on your electric bill. Your Amana brand ASZ14 Heat Pump also can provide high-efficiency heating performance up to 8.5 HSPF (Heating Seasonal Performance Factor).

With Amana brand heat pumps, your comfort and savings start with a high-efficiency Copeland® Scroll compressor. This quality component uses the latest compression technology and features overload protection. The efficient design of the scroll compressor is complemented by our durable, high-efficient condensing coil, which is made with corrugated aluminum fins and refrigeration-grade copper tubing.

In many applications, the efficiency of your Amana brand ASZ14 Heat Pump can be enhanced by using it in conjunction with an Amana brand gas furnace, air handler or modular blower that includes a variable-speed blower motor. Talk to your Amana brand dealer about opportunities to increase the efficiency of your new unit.

What is R-410A?

Compared to lower SEER, R-22 refrigerant units, our new Amana brand ASZ14 Heat Pump will not only provide you with money-saving cooling performance for many years, but it also features R-410A refrigerant. This refrigerant does not contain chlorine. Introduced in 1995, R-410A refrigerant has helped increase the durability and reliability of air conditioner compressors.

Experience Quiet Comfort

You can be assured that your Amana brand heat pump will provide you with quiet operation. To minimize operating sounds, we’ve acoustically engineered our systems with enhancements that include a compressor sound-reduction cover made of high-density foam and a specially-designed sound-control top.

Commitment to Quality Engineering

Always in pursuit of the highest performance and efficiency, our engineers are constantly evaluating the latest technology and applying it to every Amana® brand heat pump. This commitment to constant improvement ensures that our units continue to meet or surpass industry standards. The Amana brand line of heat pumps is designed and built to ensure dependable operation with continuous, trouble-free cooling comfort.

But best of all, the operation of your heat pump can be monitored and reviewed by your contractor with the use of the ComfortAlert™

Diagnostics module that we build into all of our premium Amana brand units. This module monitors data from the unit and accurately detects the cause of system-related issues.

Asure^{SM†}
EXTENDED SERVICE PLAN

For even greater peace of mind, ask your dealer or visit our web site at www.amana-hac.com for more details about Asure,SM an affordable Parts and Labor Extended Service Plan for your entire Amana brand HVAC system.[†]

AMANA[®] BRAND QUALITY

Americans have been relying on long-lasting Amana brand products since 1934, when Amana, Iowa, native George Foerstner accepted the challenge of building a dependable beverage cooler. Since then, the Amana brand has enjoyed many firsts, including developing the first cold storage locker, being the first manufacturer to nationally market an upright freezer for home use, and introducing the first portable countertop microwave oven.

From the technology behind our Million-Air[®] heat exchanger to what we believe to be the industry's best warranties* to the inclusion of high-quality filter dryers in each of our air conditioners and heat pumps, we remain committed to the Amana brand's legacy of providing consumers with premium heating and cooling products that are built to last.
